Hi Annette,

I hadn't heard that but I'm sorry to hear it isn't the news you were hoping for. I hope you don't have to move or anything. These types of things can be so disruptive to our personal lives!

I'm sure you know, if you don't hear from us within 30 days, you can move forward with the notification but you risk us turning it down once we get to it. I had a minute and didn't want you to run into any problems, so I went ahead and processed it. I was a little on the fence with "QuikPRO" since to me, it seems to imply professional strength. I see there are other homeowner product registered with "QuikPRO" though, so I went ahead and approved the names. They should be up on PPLS in the next day or two.

Best regards,  
Emily

Hi Emily:

Hope you are well.

I may have mentioned to you that Bayer Environmental Science is being divested from Bayer CropScience with the split planned for July of 2022. A business decision has been made that all products containing glyphosate will stay with Bayer CropScience and not move with the new company. I submitted the attached notification in July 2021 to add several ABNs to the Specticle Total label in response to this business decision.

I stated in my letter that after 30 days we would move forward with the name change if there was no response from EPA. I know your group is very busy, so I wanted to call this to your attention and get your feedback before I proceed with the name change. My heart is heavy with this divestment after working for Bayer for 30 years, but it is what it is. Take care.

Thank you,  
Annette
